SAMPLE PRIVACY POLICY

Fictional example for testing Privacy Compliance AI. This document is for software testing and education only. It is not a real company's policy, does not establish legal compliance, and should not be used as legal advice.

1. Basic Information

Privacy Policy Name: Sample Smart Services Privacy Policy. Version Number: 1.0. Effective Date: January 1, 2026. Last Updated: September 1, 2026. Data Controller: Example Digital Services Pvt. Ltd. Contact Information: privacy@example.com.

2. Information We Collect

We collect personal information such as your name, email address, phone number, device identifiers, and approximate location when you use our services. We explain the categories of personal data collected and the purposes for collection in this policy. We collect only information that is reasonably necessary to provide, maintain, and secure our services.

3. Purpose and Use of Information

We use personal information to provide requested services, manage user accounts, respond to support requests, prevent fraud, maintain security, and improve service reliability. We do not use personal information for unrelated purposes without providing notice and, where required, obtaining consent.

4. Cookies and Consent

Our website may use cookies and similar technologies to remember preferences and understand service usage. Where required, we provide notice and request consent before using non-essential cookies. You can change cookie preferences or opt out of optional analytics through the privacy settings available in your account.

5. Data Sharing and Service Providers

We may share personal information with service providers that process information on our behalf for hosting, customer support, analytics, and security. We identify the categories of recipients and require service providers to protect the information and use it only for authorized purposes. We do not sell personal information in this fictional example.

6. Storage, Retention, and Deletion

Personal information is stored on systems operated by our company and contracted hosting providers. We retain personal information only for as long as necessary for the stated purposes or as required by applicable rules. When information is no longer needed, we delete it or securely dispose of it according to our retention procedures.

7. Security and Incidents

We use access controls, encryption where appropriate, staff training, and security monitoring to protect personal information. We periodically review security practices and investigate suspected data incidents. If a security incident creates a notification obligation, we will notify affected individuals and relevant authorities as required by applicable law.

8. Your Privacy Rights

Subject to applicable law, you may request access to or correction of your personal information, request deletion, withdraw consent, or close your account. You may contact privacy@example.com to submit a request or complaint. We will review requests and respond in accordance with applicable requirements. Some rights may depend on your location and circumstances.

9. Children's Privacy

Our services are not directed to children under 13. We do not knowingly collect children's personal information without appropriate authorization where required. If we learn that such information has been collected improperly, we will take steps to delete it. We apply additional safeguards to children's information where applicable and assess relevant privacy and security risks.

10. International Transfers

If personal information is transferred across national borders, we will provide applicable notices, assess relevant transfer requirements, and use appropriate safeguards as required by applicable law.

11. Policy Updates

We may update this privacy policy to reflect changes in our services or practices. We will revise the Last Updated date when changes are made and provide additional notice when required.

Testing note: This sample intentionally includes common privacy-policy topics. Your indicator engine may still return NOT FOUND for some indicators if its configured keywords or rules use different wording. Use the output to identify rules that need validation.
